CAR PARK WATERPROOFING, SURFACING
AND MARKING

LIVERPOOL, UK

ASDA HUYTON

Area
3,000m²

Systems
Triflex DeckFloor

Authorised Contractor
Makers Construction Ltd.

The challenge

The single 3,000m² storey car park at the popular Asda store in Huyton, Liverpool was showing significant signs of deterioration and was in need of urgent renovation. The existing asphalt substrate was installed a number of years earlier and had been subject to high levels of trafficking and exposure to the elements. This had caused numerous defects including cracks, blisters, wheel indentations and ruckling. This was not only allowing water to penetrate the structure in some cases but was also posing a serious health and safety risk to car park users.

As well as the risk of trips and falls on the uneven surface, in the winter months indentations and cracks would fill with water and freeze, making it extremely slippery for both cars and pedestrians. The asphalt had also lost its crimp in high wear areas, resulting in a smooth surface with poor anti-slip properties in wet conditions.

Initially the scope of works was to provide a durable waterproofing and surfacing solution to the parking bays and ramps which were showing the most serious signs of wear. However following a detailed, free of charge survey by Triflex, it was determined that the entire car park was in need of refurbishment to ensure that the entire structure was protected and that an aesthetically pleasing finish was achieved.

The solution

System benefits

Triflex DeckFloor HD[®]

- Proven, fully reinforced, elastomeric waterproofing membrane
- Compatible with virtually all substrates including asphalt
- High levels of anti-skid
- Totally cold liquid applied technology
- Rapid curing system - even at low temperatures
- Maximum design options
- Certified to the highest standards

Finish

Waterproof wearing layer

Primer
